Education

2010–2013 **Master Degree in Engineering**, *Ingénieur Telecom ParisTech*.
Major: Embedded systems

Work experience

2018– **Software engineer, kickstarting Android**, *Softathome*, Colombes, Paris Area.
- Android firmware/apps CI
- Android TV Generic System Image PoC (8 SoCs vendors)
  - 8 SoC vendors (STBs, tablets and smartphones for all-in-one demos)
  - Demo of Android 9 and Android 10, 2 weeks after their source code release
- Android-stack tv player (ExoPlayer-based)
  - Partial HbbTV support (upstream part)
  - Improved SmoothStreaming support
  - Viaccess DRM integration
  - DVB/multicast support (DVB-T, DVB-SI, CAS...)
  - Seamless ad-insertion prototype
  - Faster time-to-zap optimizations (down to 120ms on multicast IPTV, 200ms on OTT)
- Android metrics analysis
- Development-focused userspace bootloader based on kexec
  - Automatically boots either latest revision or CI-controlled revision
  - Boot over network
- CI for Softathome's Linux-based STB software solution
  - Optimization of build time (2 hours => 13 minutes)
  - Integration of Gitlab and Jenkins into Softathome's build system
  - Automatic integration test run on STBs at every merge-request
- Android platforms security analysis
  - Reported Amlogic STB security flaw ranked High in Android security bulletin
  - Reported two Broadcom STB security flaws ranked High
  - Discussions with DRM/CAS provider to help them improve their security, and Android compatibility
- Rust implementation of RTP multicast receiver, including FEC and FCC support

2016–2017 **Lead software engineer**, *Archos*, Igny, Paris Area.
- Manage B2B customer technical relationship and development
- Drive and train engineer team in Archos Shenzhen
- Manage a team of 4 engineers in France
- Manage remotely a team of 4 in Shenzhen
- Handle the release, including Google certification, of nearly one new model per week

2014–2015 **Software engineer**, *Archos*, Igny, Paris Area.
- Certification Android devices for Google services (CTS/GTS)
- Creation of Android firmware-editing tools
- Creation of Archos Fusion Storage
- Development and operation of Archos OTA system
- Collection and analysis of device statistics (based on ES/Kibana)
- Development of testing tools and CI (Android firmwares, CTS, GTS, apps, ...)
  - Automatic Android firmware tests
  - CTS/GTS integration
  - List and fixes of known usual problems
  - Continuous build of various Android apps
- Support of various SoC vendors (TI, Rockchip, Qualcomm, Unisoc, MTK, ...)
- Early-detection and removal of in-firmware PHAs
- Binary security patches experiment
- Contributions to Archos Video Player
  - Audio passthrough support
  - Torrent streaming support

2013 **Intern**, *SeQureNet*, Paris.
- PCBA conception (schematics, routing)
- FPGA programming
- Linux user-space driver for FPGA

Voluntary experience

2010–2015 **Rezel voluntary association**, *Telecom ParisTech student house*.
President of the association
Managing and maintaining the local network (circa. 500 subscribers)

2017– **Phh-Treble**, *Android Generic System Image*.
- Maintaining support for devices originally running Android 8.0/8.1/9.0/10.0
- Vendor-specific workarounds in Android framework
- Support for vendor-specific features
- OTA mechanism based on Android 10's dynamic partitions
- Used as technical basis for 10+ other custom GSIs, including Ubuntu Touch
- On-going discussions with Google to discuss future of Project Treble
- Contributions reused across the whole custom ROM community, including LineageOS

2018– **Nova Video Player**, *full-featured Android Video Player, including library*.
- CI
- FDroid integration
- Torrent support maintainance
- SFTP stability

2008–2010 **XDandroid**, *Android port to Windows CE-based phones*.

2015–2017 **phh's SuperUser**, *An SELinux-aware Android super-user*.

2010–2011 **Toshiba AC100 opensource support**, *ARM-based laptop*.
- NVEC reverse engineering and driver creation (driver mainlined since then)
- Userspace audio codec driver

Miscellaneous open-source contributions.
- Linux support of RC5T619 PMIC
- Bugfixes in Apktool
- Rockchip ports (mali driver, vtl_ts, build fixes, codec, ...)
- DHCP on Android connection-time analysis
